## SUMMARY OF BENEFITS

- High quality badges are printed on any of the Brother QL range of label printers\*, so your visitors receive a professional impression of your company upon arrival.
- Two modes of visitor data entry – reception mode for managed receptions, and self check-mode where the visitor enters their own information.
- Quick entry of visitor information, and immediate recall of visitor information for repeat visitors cuts down waiting times. See which visitors are currently signed-in, and print an emergency report if required, to assist in a roll-call of all visitors.
- Take the visitor's photograph with a webcam\*, and print on the visitor badge for additional security.

---

## The total visitor badge and management solution

The VM-100VP visitor badge and management software is a total solution for registering visitors and contractors to your company, issuing high-quality printed visitor badges and the recording of visitor data for later analysis and reporting. With the VM-100VP you receive: VM-100 Visitor Badge and Management Software, 2 x DK-55224 paper rolls (to print almost 700 badges) and 12 x clip-on plastic badge holders.

## Works with any of the Brother QL range of Label Printers

This software is designed to work exclusively with any of the Brother QL range of label printers\*, giving you the freedom to choose the printer that best meets your needs. In addition to printing the visitor badges, the versatile QL printer can also be used to create temporary signage and banners (for conferences, special meetings, product launches etc), and print address labels (so you can easily mail information to the visitors before they attend any meeting or conference).

## Quick and easy to set-up and use

The software is easy to install and configure, and you can be up-and-running within minutes. VM-100 can be left running in the background of the receptionist's PC, available for use as soon as any visitor arrives. As all information is entered and displayed on one screen, entering the visitor's information, taking their photograph (if required) and printing a visitor badge takes just moments.

# Sign-in visitors with or without a receptionist

The screenshot shows a software window titled "Visitor List" with a table of visitors and a detailed sign-in form on the right.

The sign-in form on the right includes fields for: Title, Last Name (Lawson), First Name (Angela), Organization (ZDC Consulting), Proof of ID (PASSPORT 108231223), Estimated Arrival Date (26/10/2009), Estimated Departure Date (26/10/2009), Purpose of Visit (Meeting), Visitor's Destination (Building 2), Host Name (Lukas Schwabler), Organization (Sales), and Contact Info (2300). Buttons for "Sign In and Print Badge" and "Print Parking Permit" are visible at the bottom.

## Reception Mode: Sign your visitors in/out quickly, and see who is still registered on-site

- All text entry fields and options are conveniently displayed on one screen.
- Pre-register visitors in advance to reduce their waiting time even further.
- Search through the host database to quickly find the telephone number of the visitors host to let them know their visitor has arrived.
- See an up-to-date list of signed-in, signed-out or pre-registered visitors.
- Quickly print visitor badges and parking permits.

The screenshot shows a "START OVER" button at the top. Below it is a form titled "Type information into each field below." with fields for: First Name (Henning), Last Name (Jensen), Organization (Europa International), and Host's Name (Martin Jones). To the right is a preview of a visitor badge that reads: "VISITOR Henning Jensen Martin Jensen 002 19 APRIL". A "NEXT" button is located at the bottom right.

## Self Check-in Mode: Visitors sign themselves in and print their own visitor badges

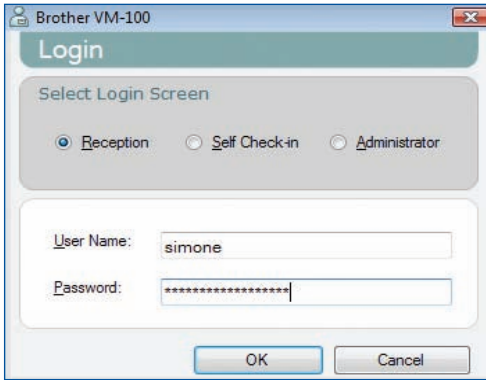

- Password protected, to stop visitors from tampering with the PC or changing settings.
- Simple step-by-step process for the visitor to enter in their information.
- Software runs full screen, with large easy-to-read fonts.
- As the visitor enters their details, a preview appears of their badge, and they can amend if needed before printing.

The screenshot shows a sign-in form with fields for: Estimated Arrival Date (26/10/2009, 15:50), Estimated Departure Date (26/10/2009), Purpose of Visit (Meeting), Visitor's Destination (CONFERENCE #2), and Message. Below this is a "Host Information" section with fields for Name (Robert Delfour), Organization (Marketing), and Contact Info (2519). At the bottom are buttons for "Preview", "Print Badge", and "Print Parking Permit", and a "Sign In and Print Badge" button.

## Quick sign-in: One-click printing of visitor and parking passes

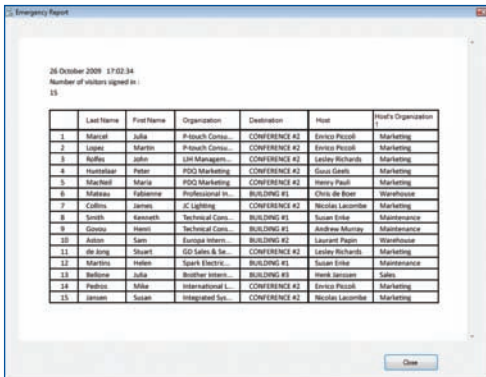

- After entering all visitor information, quickly preview the visitor badge on-screen, print the badge without signing in, or print and sign-in the visitor in one step.
- A parking permit can also be printed, issued, and be given to any security personnel should the visitor need to access any secure areas.

# Easy-to-use, secure and produces various reports whenever required

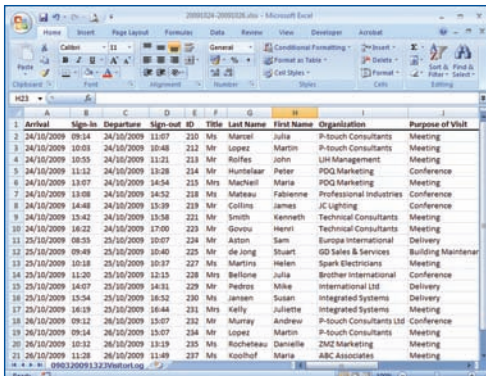

## Password Protection: Prevents unauthorised access to data by requesting a username and password

- When the software is started, a username and password is required before access to the program and data is granted.
- Limited access can be set up with a "receptionist password", that does not allow changes to the software to be made.
- The administrator password gives full access to all areas of the software, and allows full customisation and configuration as required.

## Emergency report: Immediate printing of all visitors registered as "on-site" in the event of site evacuation

- A single click of the "Emergency Report" button will send a list of signed-in visitors to your default printer, and in addition show the list on-screen.
- The button is always displayed on the receptionist's screen, instantly available when required.
- Only the currently signed-in visitors will be printed, making the roll call procedure quick and efficient.

## Detailed reporting: Export visitor data to a .csv file, for further analysis in Microsoft Excel®

- Export detailed information of visitors to a .csv file.
- This data can then be imported into Excel® or other spreadsheet programs for analysis.
- You are able to select the date range before exporting, so for example you can run the report on a monthly basis.

## Host database: Employee details can be recalled instantly, making the sign-in process quick and efficient

- Details of employees are stored in the host database.
- As the receptionist types the host name, suggestions appear automatically, speeding up the sign-in process.
- Contact information such as telephone extension numbers and email addresses can be displayed to the receptionist, allowing them to contact the host and inform them their visitor has arrived.

Options

General Reception Printer Database

Visitor Reservation Settings

Enable  Disable

Settings for Visitor Information Fields

Select which fields you would like to appear on the Reception Screen. Fields marked "Required" or "Necessary" are always filled in. Fields marked "Optional" can be filled in but are not required. Fields marked

1	Camera button	Necessary
2	Title	Unnecessary
3	Last Name	Required
4	First Name	Required
5	Organization	Required

## Customise the software: Many of the options can be changed, depending on your requirements

- Select one of the many designs of visitor badge supplied, or create your own custom badge design.
- A company logo can be chosen, and printed on every visitor badge.
- Choose the text fields to be displayed on the visitor details input screen.
- Select the location of the automatic database backup. If required, visitor information can be deleted after a specified length of time (such as 6 months).
